Steelhammer Family Property (Red)	None

# Economic Impact: Industrial Real Estate in WA

Industrial real estate drives a large share of the state's economy

## The Physical Infrastructure that Allows Washington's Economy to Function

- ✓ 40% of jobs are linked directly or indirectly to trade through manufacturing, aerospace, logistics, and port-related activity
- ✓ Northwest Seaport Alliance is the 4<sup>th</sup> largest gateway in the USA for containerized cargo from Asia
- ✓ Industrial real estate is the physical network that enables production, storage, and delivery of goods

**\$1 ▶ \$0.67**  
**INDUSTRIAL OUTPUT**

**\$230B+**  
**ANNUAL VALUE ADD**

## One of the State's Most Efficient Tax Bases

- ✓ Stable funding for schools, transportation, ports, and public services
- ✓ High fiscal yield per acre compared to residential or commercial uses
- ✓ 100,000 SF of industrial space generates over \$6.7m of public revenue from construction and 10 years of building occupation

**\$400B+**  
**ANNUAL GROSS BUSINESS INCOME**

**\$1.2M+**  
**JOBS**

# Economic Impact: Industrial Real Estate in WA (cont'd)

Why Washington's Industrial land matters to the State's economic future

- ✓ **Washington's industrial sector together with the real estate that houses it functions as one of the State's most powerful economic engines**
- ✓ **Few sectors generate comparable levels of employment, income, and economic output, or produce such broad ripple effects across the wider economy.**
- ✓ **The industrial sector directly employs more than 510,000 workers in Washington, paying out \$62 billion in wages and producing \$273 billion in goods and services**
- ✓ **Once supplier purchases (indirect effects) and household spending (induced effects) are included, the sector supports over 1.2 million additional jobs statewide**
- ✓ **Roughly 1 and 3 workers in Washington are tied directly or indirectly to industrial activity**
- ✓ **For every \$1 of industrial output, the Washington economy generates an additional \$0.67 elsewhere**
- ✓ **Employment, labor income, GDP, and business income occur because firms have access to the buildings that allows them operate; such as, warehouses, production floors, logistics hubs, cold storage, repair shops, and specialized manufacturing space. Without these facilities, the jobs, the wages, and the output shown above could not exist.**
